

Comparison of MS office and Google Workspace

Week 2 Lab Assignment

Name: Mohd. Saad

Faculty No.: 26CSBSAG537

MS Office and Google Workspace are commonly used productivity software suites. Both provide tools for creating documents, spreadsheets and presentations. This comparison evaluates the based on selected features.

Feature	MS Office	Google Workspace	Better Option
Text Formatting	Offers extensive fonts, paragraph, page and document formatting options	Provide common formatting tools such as fonts, styles, alignment and spacing	MS Office
Table Creation	Provide advanced tools for creating and formatting tables	Allows easy creation and basic formatting of tables	MS Office
Real-time collaboration	Supports collaboration through Microsoft 365 and cloud sharing	Multiple users can edit and comment on the same file in real time.	Google Workspace
File Formats	Supports many common document, spreadsheet and presentation formats	Uses its own format but can import and export common office formats	MS Office
Offline availability	Desktop application can be used offline with most features available	Offline editing is available but requires setup and not some limitations	MS Office
Macro/automation support	Supports powerful VBA macros and other automation features	Provides automation through tools such as Apps Script, but works differently from VBA.	MS Office
